The Isola 2 is a beautifully crafted, retractable roof, aluminum pergola system. Fully waterproof, it is installed level, with no slope required. Isola 2 can be installed as a freestanding unit, wall mounted, or without legs, as a retractable roof over any suitable substructure.

The roof is slightly arched to direct rainwater into a system of hidden gutters that drain down through the columns to ground level. The design of the square columns, eaves and roof system make the Isola 2 extremely compact and aesthetically beautiful. Accessorize Isola 2 with dimmable LED lights, motorized screens, clear vinyl windows and Somfy® sun, wind, or rain sensors to add automation to the pergola. Available in Charcoal or White.

Isola 2 Features

- Pre-engineered design for easy installation
- Integrated rain management provides waterproof protection
- Optional LED lighting provides soft, dimmable illumination on demand
- A variety of side enclosure options available
- Limited lifetime warranty on frame
