A100

KE

| max 42'8"	max 18'	LED Lighting	Home Automation	Wall Mounted

The Gennius A100 aluminum pergola has an elegant, slim design that makes it perfect for either residential or commercial installation. The roof design enables the fabric to seal against the patented side rails with a double gasket, directing rainwater to the integrated front gutter and downspouts. Structural rafter and post columns are engineered with strong and durable extruded aluminum profiles. Guide rails are attached to brackets to accommodate mounting on wall, soffit, or roof. The versatile A100 can alternatively be mounted on top of an existing structure.

Optional curtains or drop screens can be manual or motorized. Fabric options include a wide variety of screens or crystal-clear vinyl windows.
LED Lighting Options

- Optional dimmable LEDs create a warm, inviting outdoor space to be enjoyed all evening throughout the year. Choose from remote control or mobile app operation to control your pergola even when you're not at home.

## Fabric Options - 3-ply waterproof construction

- Ferrari 602 is a waterproof blackout fabric that blocks 100% of damaging UV light and heat.
- Ferrari 502 is a waterproof semi-translucent fabric available in a wide variety of colors.

- Ferrari W96 is a clear coated, waterproof mesh to allow daylight but not rain to pass through.

- Optional gable end completes the enclosure for a finished appearance.

BELLA PLUS
WITH DROP VALANCE

KE

max 26'	max 13'5"	Full Cassette	Semi-Cassette	Home Automation	LED Lighting	Learn More

Bella Plus is beautiful retractable awning that is available with either full cassette or semi cassette options and includes a bottom cover to help protect fabric from the elements.

Bella Plus features an expanded projection range up to 13' 5" and can be configured with either a manual or motorized drop valance for additional protection from low-angle bright sun (on models up to 11' 9" projection). Bella Plus has a versatile design that allows mounting to wall, soffit or roof.
Cassette Options

Semi Cassette

Semi cassette with drop valance option

Full Cassette

Full cassette with drop valance option

Bella Plus shown with roof mount option

Bella Plus shown closed

Benefits of Bella Plus

- Motorized drop valance available up to 11' 9" projection.

- LED lights are available on all projections.

- The internal tray supports the roller tube, allowing Bella Plus to accommodate widths up to 26' 0" without the need for center support brackets that can damage fabric through friction and abrasion.

- The hood and tray design allows the use of Somfy's Torque Sensing Motor Technology. The front rail of the full cassette model will continue to close flush against the cassette housing to prevent any gaps as a result of possible minor fabric stretching. The complete closure will fully retract the awning into the protective case system, keeping your fabric, retractable armature, framework and motor protected from damage due to rain, snow, ice, dust, dirt, squirrels and bird's nests.

EXTERIOR SCREENS

KE

Exterior screens are an excellent solution for your home or office. They not only provide privacy, but also reduce solar heating of your interior space and control up to 99% of the sun's harmful UV rays that can cause skin damage and eye fatigue as well as fade furnishings and carpeting.

A wide variety of colors and styles are available to choose from so you can find the perfect fit for your decor and functional needs.

Sizes Available

CS4 (4" Cassette): Width 3' – 13', Drop: 3' – 10'

CS5 (5" Cassette): Width 3' – 20', Drop: 3' – 16'

CS6 (6" Cassette): Width 6' – 26', Drop: 3' – 16'

CS0 (Open Roller): Width 3' – 26', Drop: 3' – 16'

KE Storm Rail System

In testing, KE Storm withstood a test pressure of 78mph wind speed, including impact from a solid projectile at a speed of 34mph. Storm Rail is one of several fabric guidance options available on KE Exterior Screens.

34 mph impact

Fabric Guidance Options

Storm Rail
Designed specifically to withstand high winds and impact from flying debris, Storm Rail uses a zipper guide system that is locked into the side rail and reinforced with a series of specially designed spring clips that absorb impact forces without causing the screen to pull away from the rail. Cross section comparison shown in image.

Zip Track
Fabric with welded side edge zipper offers a captured edge for fabric side retention and bottom hem bar end into a U shaped track with insert.

Recessed Zip Track
Inner and outer tracks are recessed into wall or columns and hidden from view upon final construction and installation.

Standard Track
U-shaped track rail with bottom hem bar end cap designed to move up and down inside the track opening.

Cable Guide
Wire top attachment to bracket or cassette guided through bottom hem bar end cap with optional attachments at the bottom.

Rod Guide
Stainless steel solid rod guidance with attachment to bracket or cassette guided through bottom hem bar end cap.
Free Hanging / No Guidance
Option with external bottom hem bar profile or concealed weight bar in fabric pocket without cable, track rail, or rod guidance assistance.
