Hydra is a retractable shading system that is installed on top of a suitable existing structure, such as a wood pergola for example.

Hydra has the added flexibility of offering either acrylic fabric (like an awning) or screen mesh (for greater airflow). Frame color options are white or charcoal.

Hydra Wall is a retractable shading system that is attached to a permanent wall and includes two front legs. Hydra has the added flexibility of offering either acrylic fabric (like an awning) or screen mesh (for greater airflow). Frame color options are white or charcoal.

Features Include:

- Choice of acrylic fabric or 4% open mesh.
- LED lights are available on all projections.
- A sophisticated, classic design that integrates easily into all styles of architecture.
- Roof, wall or soffit mounting options.
